Python Full-Stack Developer | Agentic AI & RAG Systems | Data Analytics

Professional Summary

Python Full-Stack Developer with hands-on experience building production-ready REST APIs using FastAPI and PostgreSQL, alongside Agentic AI and RAG-powered applications. Skilled in React frontends, LLM function calling, and SQL-based data analytics. Strong foundation in scalable backend design, real-time systems, and turning data into business insight.

Technical Skills

Languages: Python, SQL, JavaScript, C

Backend: FastAPI, REST APIs, WebSockets, JWT Authentication, Pydantic, APScheduler

Frontend: React, Redux, HTML, CSS, Tailwind CSS

AI / Machine Learning: Agentic AI, RAG, Prompt Engineering, NLP, Machine Learning, Vector Databases

LLM Providers / APIs: Groq, Gemini, Mistral

Data Analytics: SQL, Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel

Databases: PostgreSQL, MongoDB, SQLite, ChromaDB

Cloud & DevOps: Render, Vercel, Docker, Git, Swagger, Postman

Tools: VS Code, Cursor, Claude Code, Jupyter Notebook, Google Colab

Experience

IT Idol Technologies

Jan 2026 – Jun 2026

Python Developer Intern

Developed production-ready REST APIs using FastAPI for an Inventory Management and Ticketing System, designed PostgreSQL databases, implemented JWT authentication, built WebSocket-powered real-time notifications, and collaborated with frontend developers to integrate React applications with backend services.

CSRBOX x IBM SkillsBuild

Jun 2025 – Jul 2025

AI Intern (2 Weeks)

Completed an AI and Data internship focused on Python, NLP, data preprocessing, and machine learning workflows while working with real-world datasets.

Projects

Buddy — Cross Platform Voice Assistant

Developed a cross-platform AI voice assistant for Windows and Android featuring wake-word detection, offline speech recognition, Gmail integration, multi-provider LLM function calling, and a shared FastAPI backend with intelligent tool orchestration. GitHub: <https://github.com/krishn24-official/Assistant>

Entertainment Platform (Full Stack + Agentic AI)

Built a production-ready entertainment platform using FastAPI, React, MongoDB, JWT authentication, Agentic AI, and a RAG-powered chatbot with an automated news aggregation pipeline fetching content from eight sources every 10 minutes.

Olist E-Commerce Analytics

Analyzed 99K+ e-commerce orders using MySQL, Python, Pandas, and Power BI to identify customer behavior, revenue trends, and retention opportunities. Performed RFM customer segmentation, built SQL queries with CTEs and window functions, and designed interactive dashboards to support business decision-making.

Tech: MySQL, Python, Pandas, Power BI, Excel

GitHub: <https://github.com/krishn24-official/Olist-E-Commerce-Analytics>

Inventory Management & Ticketing System

Developed a FastAPI and PostgreSQL based inventory and ticket management system featuring secure JWT authentication, REST APIs, and WebSocket-powered real-time notifications during a six-month industry internship. Implemented role-based access control, automated stock-level alerts, and a ticket-assignment workflow to streamline internal support operations.

Education

Gujarat Technological University

2022 – 2026

Bachelor of Engineering in Information Technology

CGPA: 9.09
